Explanatory Notes on new passport requirements

The 2011 passport carries a number of changes from previous versions. These changes and the reasons for them are listed below and should be followed carefully. The layout and ordering of the passport sections has been standardised and should not be changed. Additional passports are available for downloading on the AIC, AFS and NFU websites.

The requirement for Business name and collection address details are part of the chain of custody requirements to meet the requirements of the EU Renewable Energy Directive. Please note the legislation requires the collection address to be given – this may differ from your crop assurance stickers which relate to your business address.

Section 5: Whilst a risk assessment for wheat deliveries to food processors is a year round requirement, testing outside the immediate post harvest period may vary across different processing sectors. To avoid doubt as to what is required please contact your purchaser to check actual requirements. Additionally the requirement for a risk assessment result has been clarified to show a number is required.

Section 8: A new signature declaration to meet the requirements of the Renewable Energy Directive. Required in all instances where the crop may be entering the biofuel supply chain and is in conjunction with auditing to the required sustainability criteria under crop assurance.

Section 9: Previously section 8, the wording in this section remains unaltered.
